### **DETAILED ACTION**

1. Claims 23-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on November 3, 2005.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Pratt (US 6,151,714). Pratt discloses a protective pad (10) for a joint that includes a shell (12) having a concave interior surface and a convex outer surface adjoined by a perimeter edge as shown in figure 3. Further, an elastic suspension arrangement is adjoined to a pre-tensioned resilient padded membrane (14) to define a cavity between the shell and the padded membrane, col. 2, line 29 – col. 4, line 10 and as shown in figure 4.

***Allowable Subject Matter***

4. Claims 2-14 and 16-22 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 2-14 and 16-22 are allowable because the prior art does not teach or suggest the recitation therein including a protective pad including an elastic suspension arrangement adjoined to a pre-tensioned resilient membrane which is elastically stretched in multiple directions to be suspended in a shell by defining a trampoline-type unit.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
